Homoeopathy, UK*

# Homoeopathy for Healthy Living

## Four Months Extensive Online Course in Homeopathy

### Eligibility

Any person desirous of learning the basics  
about Homoeopathy

# WHY HOMOEOPATHY?

- ▶ Homoeopathic system of medicine was originally discovered and developed by Dr. Samuel Hahnemann in 1796. Homoeopathic remedies are derived from almost every source, be it plants, minerals, compounds, animals, energy medicine etc., and undergo a process called potentization (succussion and trituration). Through this process the medicinal substance is serially diluted at each step and energized as per homoeopathic principles.
- ▶ Homoeopathy involves treating an individual holistically, keeping in view every sign, symptom, and deviation from the state of health. Homoeopathic remedies are dispensed in the form of a liquid, liquid impregnated globules/diskettes/sugar of milk, ointments, gels etc. The potentized medicines aim to trigger the body's natural system of healing by raising immunity. The treatment may be "individualized", "specific" or "clinical" i.e. tailored according to person and disease with which a person is suffering.

# WHY HOMOEOPATHY?

- ▶ Homoeopathy as an alternative system of medicine is gaining popularity due to its clinical efficacy, and scientific basis. World Health Organization recognizes it as the second largest alternative system of medicine in the world. It is officially recognized in healthcare systems of many countries. It is currently practiced in over 80 countries, and has legal recognition as an individual system of medicine in 42 countries and is recognized as a part of complementary and alternative medicine in 28 countries.
- ▶ An extensive research has been undertaken in this system of medicine ranging from observational studies to randomized controlled trials and fundamental research. Use of homeopathy has also been established in other areas like veterinary, agronomy and dentistry.

# TEACHING
